

including a computer, said message from a user of the ordering system to a recipient of the flowers; and wherein:

E4  
cont the step of linking includes linking the signals representing the packing list with signals representing the message; and

the step of printing includes printing the message, along with the packing list and a shipping label, at the printing device at the distribution center; and

the step of shipping is carried out by shipping the message, along with the product, from the distribution center.

E2  
12. (Twice Amended) The method of claim 3, wherein the step of printing is carried out with the printing device being a fax machine; and further including the step of connecting the fax machine to a communications system for receiving of the signals representing the packing list and for receiving the shipping information signals.

13. (Twice Amended) The method of claim 12, wherein the step of connecting includes connecting an open end network gateway to a remote fax server and connecting the remote fax server to the fax machine.

14. (Twice Amended) The method of claim 12, wherein the step of connecting includes connecting a remote fax server with a fax modem in a local calling area of the distribution center and connecting the fax modem to the fax machine.

15. (Twice Amended) The method of claim 3, further including the steps of:  
associating an order code with said order;  
obtaining shipping status information from the shipping apparatus; and

F

associating the order code with the shipping status information at a machine-readable site having a network gateway address in facilitating access by an ordering system, including a computer, to determine the shipping status associated with the order.

E3  
16. (Twice Amended) The method of claim 3, wherein said step of shipping includes shipping the product in packaging displaying a network gateway address to facilitate an electronic communication from an ordering system, including a computer, to the order center apparatus.

17. (Twice Amended) The method of claim 3, further including the steps of: connecting an ordering system, including a computer, to a network gateway; and connecting the network gateway to the order center apparatus.

18. (Twice Amended) The method of claim 3, further including the steps of: receiving ordering information at the order center by telephone; and entering the ordering information as input data to the order center apparatus in producing the signals representing the packing list.

E3  
20. (Twice Amended) The method of claim 1, wherein the step of printing includes printing on a sheet in the printer device; and further including the step of locating a demarcation on a sheet in the printer device for detaching the packing list from a shipping label.

21. (Once Amended) The method of claim 1, wherein the step of printing includes printing on a sheet in the printer device; and further including the step of locating a

perforation on the sheet for detaching a shipping label from the packing list at the perforation.

22. (Once Amended) The method of claim 1, further including the steps of:

receiving signals representing a customized component at the order center apparatus, from an ordering system including a computer, the customized component including a message from a user of the ordering system to a recipient of the product; and wherein:

the step of linking includes linking the signals representing the packing list with the signals representing the customized component;

the step of printing includes printing the customized component, along with the packing list and a shipping label, at the printing device at the distribution center; and

the step of shipping is carried out by shipping the customized component, along with the product, from the distribution center.

23. (Once Amended) The method of claim 22, wherein the step of printing the customized component includes printing the message on a greeting card at the distribution center.

24. (Once Amended) The method of claim 22, wherein the step of printing is carried out by locating a sheet in the printer, the sheet including a greeting card for the message and having preprinted artwork and a demarcation for detaching the greeting card from the packing list; and further including the step of separating the packing list from the greeting card by tearing the sheet at the demarcation.

25. (Once Amended) The method of claim 22, wherein the step of printing the customized element includes printing a graphical element as part of the customized component.

E

26. (Once Amended) The method of claim 1, wherein the step of assigning the waybill shipping information signals includes dynamically assigning the shipping information signals through a TCP/IP connection.

27. (Once Amended) The method of claim 1, further including the step of:  
translating some of the signals, at the order center apparatus, to produce the signals representing the packing list and the shipping signals in one digital format.

28. (Once Amended) The method of claim 1, wherein the step of printing is carried out by using a fax machine as the printing device; and further including the step of connecting the fax machine to a communications system for the receiving of the signals representing the packing list.

29. (Once Amended) The method of claim 28, wherein the step of connecting includes connecting via an open end network gateway to a remote fax server and connecting the remote fax server to the fax machine.

30. (Once Amended) The method of claim 28, wherein the step of connecting includes connecting to a remote fax server with a fax modem in a local calling area of the distribution center for a subsequent communication to the fax machine.

31. (Once Amended) The method of claim 1, further including the steps of:  
associating an order code with said order;  
obtaining shipping status information from the shipping apparatus; and

associating the order code with the status information at a machine-readable site having a network gateway address in facilitating access by a computer to determine shipping status associated with the order.

32. (Once Amended) The method of claim 1, wherein said step of shipping includes shipping the product in packaging displaying a network gateway address to facilitate an electronic communication from an ordering system, including a computer, to the order center apparatus.

33. (Once Amended) The method of claim 1, further including the steps of: connecting an ordering system, including a computer, to a network gateway; and connecting the network gateway to the order center apparatus.

E3 cont

34. (Once Amended) The method of claim 1, further including the steps of receiving ordering information at the order center by telephone; and entering the ordering information as input data to the order center apparatus in producing the signals representing the packing list.

35. (Once Amended) The method of claim 1, further including the steps of: prior to carrying out the step of shipping the product, verifying availability on a charge card to pay for the product with an electrical communication from the order center apparatus to a charge card system, including a computer; and

subsequent to carrying out the step of shipping the product, sending a second electronic communication to the charge card system to obtain payment for the product.

E3  
COK

36. (Once Amended) The method of claim 35, further including the steps of:  
scanning a shipping label to obtain scanning data;  
transmitting the scanning data to trigger the step of sending a second electronic  
communication.

E4

38. (Twice Amended) A method for using an order center apparatus to  
ship a product, the method including the steps of:  
receiving an order from a web site at the order center apparatus located at an  
order center, the order center apparatus including a computer having a processor;  
controlling the processor with a computer program to the produce signals  
representing a packing list for the order;  
receiving a waybill tracking number receiving from a shipping system including a  
computer;  
associating signals representing the waybill tracking number with said signals  
representing the order;  
locating a printer device at a distribution center separate from the order center  
and separate from the shipping system;  
printing the packing list at the printer device from the signals representing the  
packing list; and  
locating the product identified by the packing list in packaging for courier  
shipment from the distribution center according to a waybill corresponding to the waybill  
tracking number.

39. (Twice Amended) A method for using an order center apparatus to ship a  
product, the method including the steps of:

E

*E4  
cont*

providing the order center apparatus at an order center, the order center apparatus including a computer having a processor controlled by a computer program in producing output signals representing a packing list for an order of the product;

producing waybill shipping information signals at a shipping system, including a computer;

linking the order center apparatus to a communications system, including the Internet, for transmitting the electrical signals representing the packing list;

linking the shipping system to a communications system, including the Internet, for transmitting the electrical signals representing the packing list;

locating a printer device linked to the communications system at a distribution center separate from the ordering center and separate from the shipping system;

receiving the packing list at the printer device;

receiving the signals representing the waybill shipping information signals at the printer device;

printing a waybill at the printer from the waybill shipping information signals;

printing a packing list from the signals representing the packing list; and

shipping the product specified by the packing list, according to the waybill, from the distribution center.

40.(Once Amended) The method of claim 1, wherein any one of the steps of assigning shipping information signals, linking by digital communication, and receiving the signals representing the packing list is carried out by communicating over the Internet.

40.(Once Amended) The method of claim 1, wherein any two of the steps of assigning shipping information signals, linking by digital communication, and receiving the signals representing the packing list is carried out by communicating over the Internet.

41.(Once Amended) The method of claim 1, wherein all of the steps of assigning shipping information signals, linking by digital communication, and receiving the signals representing the packing list is carried out by communicating over the Internet.

42. (Once Amended) The method of claim 1, wherein all of the steps of assigning shipping information signals linking by digital communication, and receiving the signals representing the packing list is carried out by communicating over the Internet.

E4 Cont  
sl F4 > 43. (Once Amended) A method for using an order center apparatus to enable a user of an ordering system to ship a gift and a message to a recipient, the method including the steps of:

specifying the gift, and communicating the user-composed greeting message, for receipt by the recipient by connecting the ordering system, including a computer, to a web site;

connecting the web site to the order center apparatus located at an order center, the apparatus including a processor controlled by a computer program;

shipping the gift to the recipient; and

using the processor to communicate the user-composed greeting message to the recipient.

44. (Once Amended) The method of claim 43, wherein the step of communicating the user-composed greeting message is carried out by using Blue Mountain-type greeting card and a graphical element.

45. (Once Amended) The method of claim 43, wherein the step of communicating the user-composed greeting message is carried out by using Blue Mountain-type greeting card and a customized component.

46. (Once Amended) The method of claim 43, wherein the step of communicating the user-composed greeting message to the recipient is carried out by using Blue Mountain-type greeting card.

E4 Cont. Sub FS 47. (Once Amended) A method for using an order center apparatus to implement a delivery customized and fulfilled just for a recipient, the method including the steps of:

producing output electrical signals representing a list of necessary intermediates of a flower arrangement for a delivery customized and fulfilled just for a recipient by causing an order center apparatus located at an order center to change input digital electrical signals received from an Internet web page into the output digital electrical signals, the order center apparatus including a computer having a processor, the processor controlled by a computer program;

assigning waybill tracking information signals to the order;

linking, by digital communication, the signals representing the list with the shipping information signals;

communicating the signals representing the list to a printer device at a

distribution center located separately from the order center; and

making the delivery customized and fulfilled just for the recipient, by waybill shipment, from the distribution center.

*sub  
F5* 48. (Once Amended) The method of claim 43, further including the step of communicating an email confirmation of the order to an electronic address of the ordering system computer.
